EDUCATION

University of Oxford, UK 2014 – 2017

- Doctor of Philosophy (DPhil) in Engineering Science
  - Thesis: Deep Neural Networks in Computer Vision and Biomedical Image Analysis
  - Supervisors: Professor Alison Noble OBE FREng FRS & Professor Andrew Zisserman FRS
  - Examined by: Professor Andrea Vedaldi (internal) & Professor Daniel Rueckert (external)

University College London, UK 2012 – 2013

- Master of Science (MSc) in Computer Graphics, Vision and Imaging
  - Thesis: Document Authorship Recognition with Machine Learning
  - Passed thesis **with distinction**

Queen Mary, University of London, UK (Exchange student with partial scholarships) 2011 – 2012

- Bachelor of Science (BSc) in Telecommunication Engineering with Management
  - Graduated with **First-class Honours**

Beijing University of Posts and Telecommunications, China 2008 – 2011

- Bachelor of Science (BSc) in Telecommunication Engineering
  - Graduated with **First-class Honours**

WORK EXPERIENCE

Department of Engineering Science, University of Oxford. Nov 2017 – Present

- Postdoctoral Researcher in Visual Geometry Group, Seebibyte Project.
  - Develop new Deep Learning architectures for template-wise face recognition.
  - Transfer current computer vision technologies to industry and other academic disciplines, such as archaeology, art, geology, medicine, plant sciences and zoology.

MRC Laboratory for Molecular Cell Biology, University College London. Sep 2013 – Feb 2014

- Research Assistant.
  - Develop cell tracking systems for microscopy video streams.

AWARDS & SCHOLARSHIPS

- **Best Paper Award** MICCAI workshop on Fetal and InFant Image Analysis, FIFI 2017. 2017
- **Best Poster Award** Functional Imaging and Modelling of the Heart, FIMH 2017. 2017
- **Google Oxford-Deepmind Graduate Scholarships** Google DeepMind 2015 – 2017
  Oxford-DeepMind Full Graduate Scholarships in Machine Learning and Biomedical Image Analysis.
- **Magadalen Award** China Oxford Scholarship Fund (COSF). 2014 – 2015
  For students with excellent academic record.
- **Travel Award** Wolfson College, Oxford. 2015

RESEARCH INTERESTS

Human Speaker (Voice) Recognition Jun 2018 – Present

- Explore Deep Learning architectures for speaker recognition.
- Supervisor: Professor Andrew Zisserman

Category-agnostic Objects Counting Jan 2018 – Present

- I am currently co-supervising Ms Erika Lu, a Dphil candidate, on developing machine learning models that are capable of counting objects of any categories in an image. I am co-developing mahine learning models that are capable of counting obejcts of any categories in an image. While deploying the pre-trained model to unseen domains, it also enables fast adaptation by human interaction.
  Supervisor: Professor Andrew Zisserman

Human Face Recognition Nov 2017 – Jun 2018

- I have been a principal contributor in collecting and releasing the *first* large-scale face recognition dataset (VGGFace2), with large pose and age variations, while having minimal label noise.

- I have developed the state-of-the-art Deep Learning architecture (Comparator Networks) for template-wise face verification. This novel architecture design can ingest multiple images as input, measure relative image visual qualities with internal competition, and encode multiple discriminative regions by soft-attention mechanism, all in one end-to-end trainable system.
- Supervisor: Professor Andrew Zisserman

Structure Segmentation in Cardiac Magnetic Resonance (CMR) Imaging Dec 2016 – Dec 2017

- I have co-developed the first Deep Learning architecture (Ω-Net) that offers the potential to mimic the diagnosis process of cardiac radiologists, where structure localization, re-orientation and segmentation on the cardiac MR videos are trained simultaneously in one model.
  Supervisor: Professor Alison Noble & Professor Andrew Zisserman

Key Structure Localization & Alignment in 3D Fetal Neurosonography Nov 2016 – Aug 2017

- I have co-developed the Deep Learning model for 3D brain structure localization and fully-automated alignment of 3D fetal brain ultrasound volume to a canonical reference space using multi-task Convolutional Neural Networks (CNNs).
  Supervisor: Professor Alison Noble & Professor Andrew Zisserman

Cell Detection & Counting in Microscopy Imaging Dec 2014 – Jun 2015

- I have proposed the *first* Fully Convolutional Regression Networks (FCRNs) for microscopy cell detection and counting, which has now become a standard approach in this field. According to Google Scholar, this work has been cited 67 times.
  Supervisor: Professor Alison Noble & Professor Andrew Zisserman

PRESENTATIONS

- IEEE International Conference on Automatic Face and Gesture Recognition (F&G), Xi'an, China, 2018
- Deep Learning Workshop in MICCAI, Munich, Germany, 2015
- Microscopy Cell Counting with Fully Convolutional Networks, in Heidelberg Collaboratory for Image Processing Group, Heidelberg, Germany, 2015

PROFESSIONAL & ACTIVITIES

- Reviewer for MICCAI, ECCV.
- Reviewer for IEEE Transactions on Medical Imaging.
- Reviewer for IEEE Journal of Biomedical and Health Informatics.
- Reviewer for Transactions on Pattern Analysis and Machine Intelligence.

LANGUAGES

- Chinese (Native)
- English (Full Professional Proficiency)
